KEY Functional Capacity Assessments Training Series CEUs = 24 Contact Hours

This three-day Triad Training teaches participants how to administer the KEY Family of Assessments, including Whole Body Return-to-Work Assessments, Prior-to-Hire Assessments, Family & Medical Leave Assessments, Healthy Worker Audits, and Upper Extremity Assessments.

This course emphasizes the background, technology and methodology for administering functional capacity assessments for the injured and uninjured population.

Working in small groups, trainees rotate through the roles of the Assessment Specialist, the Client and the Coach, practicing and being graded with examples from the real world of Assessments. In that it is a certifying process, with partner trainees assisting and critiquing each other as the training progresses, each trainee integrates the complexity of the client /assessment relationship and is able to administer the KEY Assessments upon completion of the three-day course.

Who is eligible for training?
